

INGRESYS[®]
COLLECTIONS MANAGEMENT

INGRESYS[®] is a solution for handling all collection procedures. Is a solution to manage all revenue collection processes. It streamlines processes, improving services to constituents in the municipality.

Funcionalities

Patent printing and SUT form registration

- Allows the generation of forms related with collections and business licenses processes. Allows data entry of the business declaration of volume for the collection and printing of the municipal patent
- The system allows to record the sales and use tax forms and the payments received on the Sales and Use Tax (SUT), to make queries and to generate reports instantly
- Allows queries which facilitates the documentation of procedures associated with the recording and collection of payrolls of the Sales and Use Tax
- Manages the integration of registered transactions through the COFIM portal and bank branches, which allows greater visualization of revenues

Closing and deposit process

- Allows the assortment of receipts per collector and by bank account
- Facilitates the process of the daily deposit schedule

What can you manage with INGRESYS®?

The system has the ability to efficiently manage all aspects of the revenue collection process, such as:

Automatic calculation of penalties and interests

Transaction entry

Collection of special contributions

Instant generation of receipts and licenses

Reports and patents

Construction taxes

Outbound business licensing process

Posting to various financial subsystems

Closure and deposits

Collection of miscellaneous revenues

Benefits

- Maximizes the efficiency and accuracy of collection processes
- Facilitates reports and reconciliations
- Allows the municipality to be more productive
- Simplifies revenue collection processes
- Eliminates effort duplicity
- Comply with government laws
